

Custom made Coils

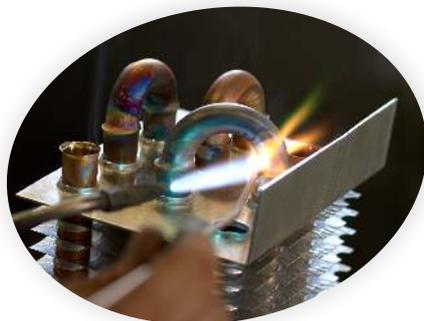

Applications: • Direct expansion coils • Condensing coils • Chilled/hot water coils • Steam heating coils • Natural convection direct expansion coils

Technical characteristics: • 3/8", 1/2", 5/8" heavy duty copper tubes with 0.5mm thickness • Aluminum fins with 0.22-0.3mm thickness. Fin pitch from 2mm to 14mm • Copper manifolds, distributors • Aluminum casing

Optional: • Anti-corrosion treatment • Copper fins • Steel manifolds

Machinery equipment

Machinery equipment:

- 3 set fin press lines for 3/8", 1/2", 5/8"
- 3 set tube cutting machines for 3/8", 1/2", 5/8"
- 3 set tube bending machines for 3/8", 1/2", 5/8"
- 3 set tube expansion equipment for 3/8", 1/2", 5/8"
- CNC Punching machine 6mm
- Sheet metal cutting machine 4mm
- Sheet metal bending machine 4mm
- Supplementary equipment

Software:

- UNILAB COILS software specialized for calculation, design and analysis of coils
